ABOUT ME

Computer Engineering graduate with hands-on experience in Python, Django, HTML, CSS, JavaScript, and full-stack web development. Skilled in building responsive web applications, implementing backend logic, authentication systems, CRUD operations, and database management. Developed projects including an Expense & Savings Tracker. Passionate about backend development and software engineering with strong problem-solving skills.

INTERNSHIP

Python Developer Intern

- Independently developed and maintained a full-stack Django web application, taking end-to-end ownership of the project lifecycle.
- Designed and implemented Django-based backend logic including database models, authentication, and CRUD operations.
- Utilized Git and GitHub for version control and code management throughout the development lifecycle.
- Resolved complex database modeling challenges by designing optimized Django models, demonstrating strong problem-solving skills.
- Collaborated with mentors to gather requirements, review code, and iterate on project features throughout development.

EDUCATION

Kalol Institute of Technology, Gujarat,

2026 | Gujarat

Bachelor of Engineering (Computer Engineering)

CGPA: 7.95/10

SKILLS

Languages (Python, C, JavaScript, HTML, CSS) | **Frameworks & Technologies** (Django, SQLite, JSON) |

Tools (Git, GitHub, VS Code, Agile Methodology)

PROJECTS

Expense & Savings Tracker

- Built an expense tracking application using Django and SQLite.
- Implemented authentication, dashboard, and CRUD functionality.
- Managed source code with Git and GitHub for version control; deployed the application for live hosting.

E-Commerce Web Application

- Developed an e-commerce website with product management.
- Designed responsive pages using HTML, CSS, and JavaScript.

Personal Portfolio Website

02/07/2025 – 16/07/2025

- Designed and developed a personal portfolio website to showcase projects and skills.
- Deployed and hosted the site using GitHub Pages with Git-based version control.
- Managed project tasks using a structured task board, following an Agile-inspired workflow for timely delivery.
- Learned and implemented JSON for data handling and content structuring within the portfolio website.
